

GAME-ON'2002 FINAL PROGRAMME

O= presentation with Overhead

LCD= presentation with LCD Projector

The underlined authors are usually the presenters, Papers in grey boxes are candidates for the best paper award

Conference Site: University of Westminster, Harrow Campus, Northwick Park
London , United Kingdom

Thursday, November 28, 2002

16.30 - 17.30 **Registration Westminster University**

17.30 - 18.30 **Reception**

Friday, November 29, 2002

08.45 - 17.00 **Registration Westminster University**

09.00 - 09.15 **Welcome**

Welcome Address

Quasim Mehdi, Wolverhampton University, Wolverhampton, UK

Norman Gough, Wolverhampton University, Wolverhampton, UK

09.15 - 10.00 **Session I**

KEYNOTE SPEAKER

09.15-10.00

Session Chairperson:

Quasim Mehdi, Wolverhampton University, Wolverhampton, UK

KEYNOTE

Game Engines in Intelligent Virtual Environments Research

Marc Cavazza, University of Teesside, United Kingdom

10.00 - 10.30 **Coffee Break**

10.30 - 12.30 **Session II**

LEARNING TECHNOLOGIES

10.30-12.30

Session Chairperson:

Norman Gough, Wolverhampton University, Wolverhampton, UK

GAME-1-O-LCD

Learning by Imitation of Behaviors for Autonomous Agents

Cédric Buche, Marc Parenthoën and Jacques Tisseau.....**89**

Friday, November 29, 2002

GAME-28-LCD

Evolving Improved Opponent Intelligence

Pieter Spronck, Ida Sprinkhuizen-Kuyper and Eric Postma94

GAME-30-LCD

Temporal Difference Learning and the Neural Movemap Heuristic in the Game of Lines of Action

Mark E.M. Winands, Levente Kocsis, Jos W.H.M. Uiterwijk and H. Jaap van den Herik99

GAME-37

Multiagent Reinforcement Learning for Computer Games Agents

Jing Duan, N.E.Gough and Q.H.Mehdi104

12.30 - 13.30 **Lunch**

13.30 - 15.00 **Session III**

13.30-15.00

STORYTELLING AND NATURAL LANGUAGE PROCESSING

Session Chairperson:

Marc Cavazza, University of Teesside, Middlesborough, UK

GAME-13

Investigation into Speech based Interaction for Video Games

Eleni Spyridou and Ian Palmer65

GAME-20

Real-Time Camera Control for Interactive Storytelling

Fred Charles, Jean-Luc Lugin, Marc Cavazza

and Steven J.Mead73

GAME-17

Generation of a 3D Virtual Story Environment Based on Story Description

Xin Zeng, Q.H.Mehdi and N.E.Gough77

15.00 - 15.30 **Coffee -Tea Break**

Friday, November 29, 2002

15.30 - 18.00 **Session IV**

AGENTS, BEHAVIOURS, PLANNING AND MOTION

15.30-18.00

Session Chairperson:

David Al-Dabass, Nottingham Trent University, Nottingham, UK

GAME-4

Generating Dynamic Motions for Articulated Figures

Stefan M.Gruenvogel.....37

GAME-14

The μ -SIC System; A Connectionist Driven Simulation of Socially Interactive Agents

Brian Mac Namee and Padraig Cunningham.....129

GAME-8

A Physics Based Motion Control Algorithm for Dynamical Game Environments

H.Cheng, T.R.Wan and R. Earnshaw134

GAME-6-LCD

Coordinating Agent Movements in a Semi-Concurrent Turn-Based Game of Strategy

Tristan Pannérec.....139

GAME-21

Search Based Planning: A Model for Character Behaviour

Miguel Lozano, Steven Mead, Marc Cavazza

and Fred Charles.....144

19.00 - 21.00

Conference Dinner

At the Curry Centre, 126 Pinner Road, Harrow (Tel: +44.208.861.5992)

Saturday, November 30, 2002

08.30 - 11.00 **Registration Westminster University**

08.30 - 10.00 **Session V**

NEURAL NETWORKS AND EVOLUTIONARY SYSTEMS

08.30-10.00

Session Chairperson:

Norman Gough, Wolverhampton University, Wolverhampton, UK

GAME-12-O-LCD

Online Coevolution for Action Games

Pedro Demasi and Adriano J. de O. Cruz 113

GAME-3-LCD

Classifiers System, as 'ANIMAT' Architectures for Action Selection in MMORPG

Gabriel Robert, Pierre Portier and Agnès Guillot..... 121

GAME-22

Neural Networks for animating Variations in Character Behaviours

Z.Wen, Q.H.Mehdi and N.E.Gough..... 189

10.00 - 10.30 **Coffee-Tea Break**

10.30 - 12.30 **Session VI – ROOM A**

APPLICATIONS I: FLIGHT AND WARGAME SIMULATIONS

10.30-12.30

Session Chairperson:

to be announced later

GAME-23

Introducing Emotion into Military Simulation and Video Game Design America's Army: Operations and VIRTE

Russell Shilling, Michael Zyda and E. Casey Wardynski 151

GAME-5

Training the Soldier for OOTW

Sonia R. von der Lippe and Bradley C. Schricker 160

GAME-27

Steps toward Building of a Good AI for Complex Wargame-Type Simulation Games

Vincent Corruble, Charles Madeira and Geber Ramalho 155

Saturday, November 30, 2002

GAME-26

Recognising Situations in a Flight Simulator Environment

Patrick A.M. Ehlert, Quint M. Mouthaan and [Leon J.M. Rothkrantz](#) 165

10.30 - 11.30

Session VII – ROOM B

EU-GAMENET MEETING

10.30-11.30

Session Chairperson:

Norman Gough, University of Wolverhampton, Wolverhampton, UK

This meeting is intended to introduce the Gamenet proposal to the wider audience of the conference and to draw reactions from the group and suggestions on how to proceed with this EU initiative.

12.30 - 13.30

Lunch

13.30 - 15.00

Session VIII – ROOM A

APPLICATIONS II: NETWORK, BOARD, MISCELLANEOUS

13.30-15.00

Session Chairperson:

Quasim Mehdi, University of Wolverhampton, Wolverhampton, UK

GAME-29-LCD

Programming a Computer to play and solve Ponnuki

Erik van der Werf, Jos Uiterwijk and Jaap van den Herik 173

GAME-7-LCD

Active Objects to Develop Computer Games for Blind Children

Cyrille Bertelle, [Antoine Dutot](#), Damien Olivier

and Guillaume Prévot..... 178

GAME-25

A Multimodal Lego Robot

Guillaume Barraud, Priam Pierret and [Léon Rothkrantz](#) 181

13.30 - 15.00

Session IX – ROOM B

RENDERING ALGORITHMS

13.30-15.00

Session Chairperson:

Marc Cavazza, University of Teesside, Middlesborough, UK

Saturday, November 30, 2002

GAME-11-SL

Efficient Mip Mapped Texture Compression by Vector Quantisation and Wavelet Decomposition

Stephen J. McGlinchey 42

GAME-31

Real-Time Generation of Impact Effects in Virtual Environments with Application to Games

Ryan Doyle, Richard Cant and David Al-Dabass 47

GAME-24

A New Realistic Motion Blur Algorithm

James Flannery, Richard Cant and David Al-Dabass 56

15.00 - 15.30 **Coffee-Tea Break**

15.30 - 18.00 **Session X**

15.30-18.00

DEVELOPMENTS IN GAMES

Session Chairperson:

David Al-Dabass, Nottingham Trent University, Nottingham, UK

GAME-10-LCD

Enhancing the Immersive Experience

Stuart Slater 5

GAME-32

A Comparative Assessment of Recent Hybrid AI Techniques for Games

Julian Churchill, Richard Cant and David Al-Dabass 10

GAME-15

Networked Team Games

Fiona French, Nic Hollinworth, Nigel Medhurst and Xavier Viader 16

GAME-16-LCD

Real-Time Video Based Motion Capture System as Intuitive 3D Game Interface

Yoshiaki Akazawa, Yoshihiro Okada and Koichi Nijima 22

GAME-36-LCD

Emergent Modelling in Games Development

Lubo Jankovic 29

Saturday, November 30, 2002

18.00 - 18.15 **Closing Session**

CLOSING SESSION AND BEST PAPER AWARD

18.00-18.15

Session Chairperson:

Norman Gough, Wolverhampton University, Wolverhampton, UK

Philippe Geril

Closing Announcements

Sunday, December 1, 2002

Trip on the Thames and visit to the Maritime Museum and Greenwich Observatory

Departure at 10.00 o'clock from Westminster University

KEYNOTE SPEECH

Game Engines in Intelligent Virtual Environments Research

Marc Cavazza, University of Teesside

Research in Intelligent Virtual Environments investigates the role of Artificial Intelligence to support behavioural modelling of the environment itself or of virtual agents populating it.

In recent years, the use of game engines in scientific research has gained popularity and some form of academic respectability, when these have been used in various contexts: virtual heritage, intelligent agents, and even immersive Virtual Reality. Game engines provide an ideal development environment for Intelligent Virtual Environment as they support advanced graphic rendering, incorporate real-world physics, and provide many features for the integration of external software.

In this talk, I will illustrate the use of game engines, more specifically the Unreal Tournament™ engine, in several research projects in Intelligent Virtual Environments:

- Character-based interactive storytelling**
- Interactive problem solving in virtual environments**
- Virtual patients based on qualitative simulation**
- “Alternative Reality” experiments, exploring alternative laws of physics**

These will also illustrate a great diversity of software architectures and programming languages used.

By providing outstanding performance on the graphical side, games engine enable us to concentrate to the specific research topics, while still providing rich experimental settings in which these ideas can be tested.
