

<b>Preface</b> .....	<b>VII</b>
<b>Scientific Programme</b> .....	<b>1</b>
<b>Author Listing</b> .....	<b>141</b>

## DATA MANAGEMENT

<b>Using Data Mining to Predict Secondary School Student Performance</b> Paulo Cortez and Alice Silva.....	<b>5</b>
---	----------

<b>Electronic Health Record in the TTF Framework</b> Elena Ciancimino and Salvatore Cannella.....	<b>13</b>
--	-----------

## PERFORMANCE ESTIMATION AND FORECASTING

<b>MPSOC Design Flow Based of Performance Estimation</b> Kamel Smiri, Abderrazek Jemai, Nihel Chibani and Mohamed Moalla .....	<b>19</b>
---	-----------

<b>Signal-Based predictive Condition Monitoring</b> Egon Müller and Steffen Leischnig .....	<b>27</b>
--	-----------

## SCHEDULING METHODOLOGY

<b>A Robust What-if Bullwhip Analysis</b> Salvatore Cannella and Elena Ciancimino.....	<b>33</b>
---	-----------

<b>Holistic Metrics Applied to a Practical Supply Chain Study</b> António E. S. Carvalho Brito and J. Manuel Feliz-Teixeira .....	<b>41</b>
--	-----------

<b>Heuristic Approach as a Way to Improve Scheduling in ERP/APS Systems</b> František Koblasa, Luís S. Dias, José A. Oliveira and Guilherme Pereira .....	<b>47</b>
--	-----------

## EMERGENCY, RISK AND SAFETY CRITICAL SYSTEMS

<b>The FLOREAN System: Emergent Flood Prediction</b> Ivo Vondrák, Jan Martinovič, Jan Kožusznik, Svatopluk Štolfa and Jan Unucka.....	<b>55</b>
---	-----------

<b>Defining Project Risk Management Efficiency through Simulation</b> Konstantinos Kirytopoulos, Viktor Diamantas and Vrassidas Leopoulos .....	<b>58</b>
--	-----------

## CONTENTS

<b>ICT Security Management and Risk Management</b> Jeanne Schreurs and Rachel Moreau.....	63
--	----

## STRUCTURES, ARCHITECTURES AND MODELS

<b>Extension of Formal Concept Theory for Organization Structure Analysis</b> Jan Kozusznik and Ivo Vondrak.....	71
---	----

<b>Towards an Integrated Corporate Information System: Building up a Sales Product Data Model to cope with the emerging Complexity of E-Business</b> Christian-Andreas Schumann and Andreas Rutsch.....	74
--	----

<b>An Architecture for Collaborative Working Environments in Manufacturing Industry</b> Ana Correia, Cristina Grama, Dragan Stokic, Ana Campos, Rui Neves Silva and Jon Aguirre .....	79
---	----

## WORKFLOW SIMULATION

<b>Partial Recognizing Algorithm for Verification of Workflow Processes</b> Armen Kostanyan and Anna Varosyan .....	89
--	----

<b>Modelling Time-Constrained Collaborative Workflows based on timed Recursive Ecatnets</b> Kamel Barkaoui and Awatef Hicheur .....	95
--	----

## LOGISTICS APPLICATIONS

<b>Assessment of Delivery Strategies by applying lexicographic Optimization and Design of Experiments: A Case Study</b> Herminia I. Calvete, Carmen Gale, Maria-Jose Oliveros, and Belen Sanchez-Valverde .....	103
---	-----

<b>A Linear Programming Model for the Storage Location Assignment Problem – A case Study</b> Carla Geraldés, Sameiro Carvalho and Guilherme Pereira .....	111
--	-----

<b>Using 3-D Simulation in an Industry Internal Logistic Process</b> Vik Pavel, Luís S. Dias, José A. Oliveira and Guilherme Pereira.....	116
--	-----

## CASE STUDIES

### **Simulation Building Blocks for Business Engineering of Mobile Field Services**

Tennov Simanjuntak, Yan Wang, Marijn Janssen and Alexander Verbraeck ...123

### **Quality Management in the Design of the Construction**

José Carvalho, Jean-Claude Mangin and Gérard Sauce.....128

### **Definition of a Logistics Model in the Construction Industry – Case Study**

Tiago Pinho, José Telhada and Maria Sameiro Carvalho.....133
